### Footnotes:

1 The number of Physicians, Physician's Assistants, and Nurse Practitioners in active practice in each state is estimated by ONC using SK&A data. SK&A is market research company that surveys health care providers. ONC procures this data and uses it to estimate the number of providers in each state. These health care provider estimates include all providers in the related specialties, so it includes more providers than are eligible to participate in the CMS EHR Incentive Programs, given those programs participation requirements. Accordingly, estimates in this table may actually underestimate the share of eligible providers in each state that are participating in the CMS EHR Incentive Programs.

2 The unduplicated count of physicians, NPs, and PAs who have received a payment under the Centers for Medicare and Medicaid Services' EHR Incentive Programs. Results of this analysis may defer from summary statistics reported by CMS. For more information, contact [ONCRequest@hhs.gov](mailto:ONCRequest@hhs.gov)

3 Percentages for March 2014 are based on the estimated rate change. State data not available for March 2014 calculations.
